

# DCPro Downloadable Version

---

## *Installation Instructions*

### **Overview**

Filename:DCProOffline.exe

Version: 1.0

Download size: 4.7 MB

Date Published: August 2011

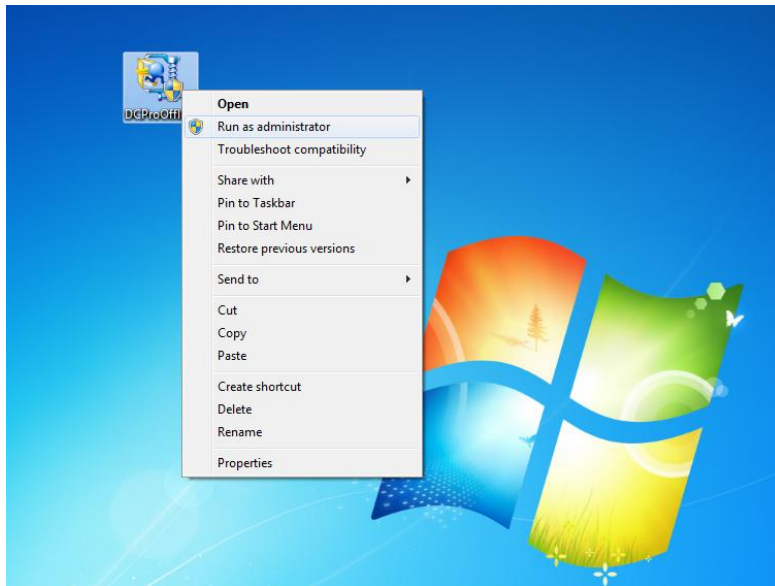

This downloadable provides a standalone copy of the Data Center Profiler tool (DCPro) - Beta version. You can use this version to run the DCPro tool to create new cases and save the case information to your local computer. This version of the tool runs on Microsoft Windows computers with Internet Explorer version 7 or higher. The downloadable version is designed to allow you to complete a data center profile and save the case to your local computer without having to connect to the internet. When you complete a DCPro case, this tool will generate a customized, printable report that provides an overview of the energy purchases, energy-use breakdowns, and suggested next steps, as well as a comparative analysis with other data centers.

### **System Requirements**

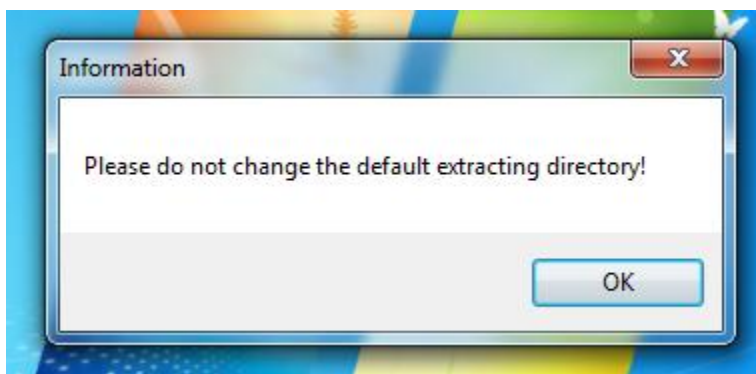

- OS Microsoft Windows 7
- Microsoft IE 7 or higher
- 32-bit Operating system
- .NET framework 2.0 or higher
- Administrative privileges on the local computer

### **Download and Installation instructions**

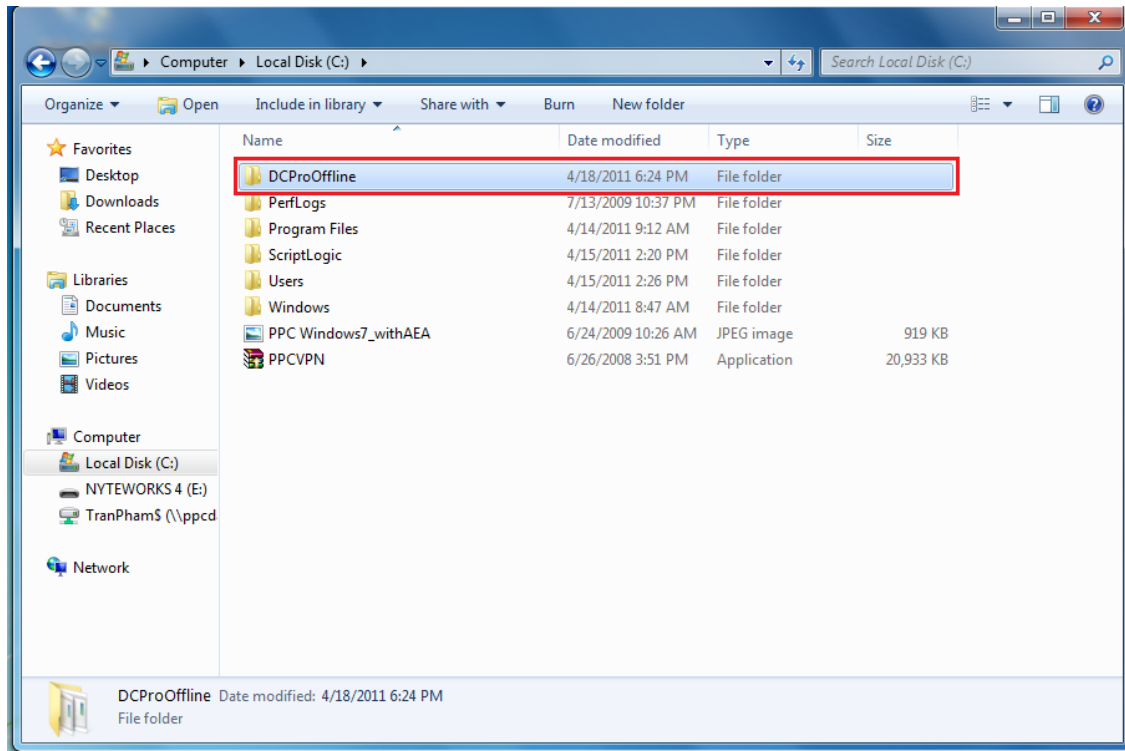

1. Right click on the self-extracting executable file "DCProOffline.exe", select option "Run as administrator"

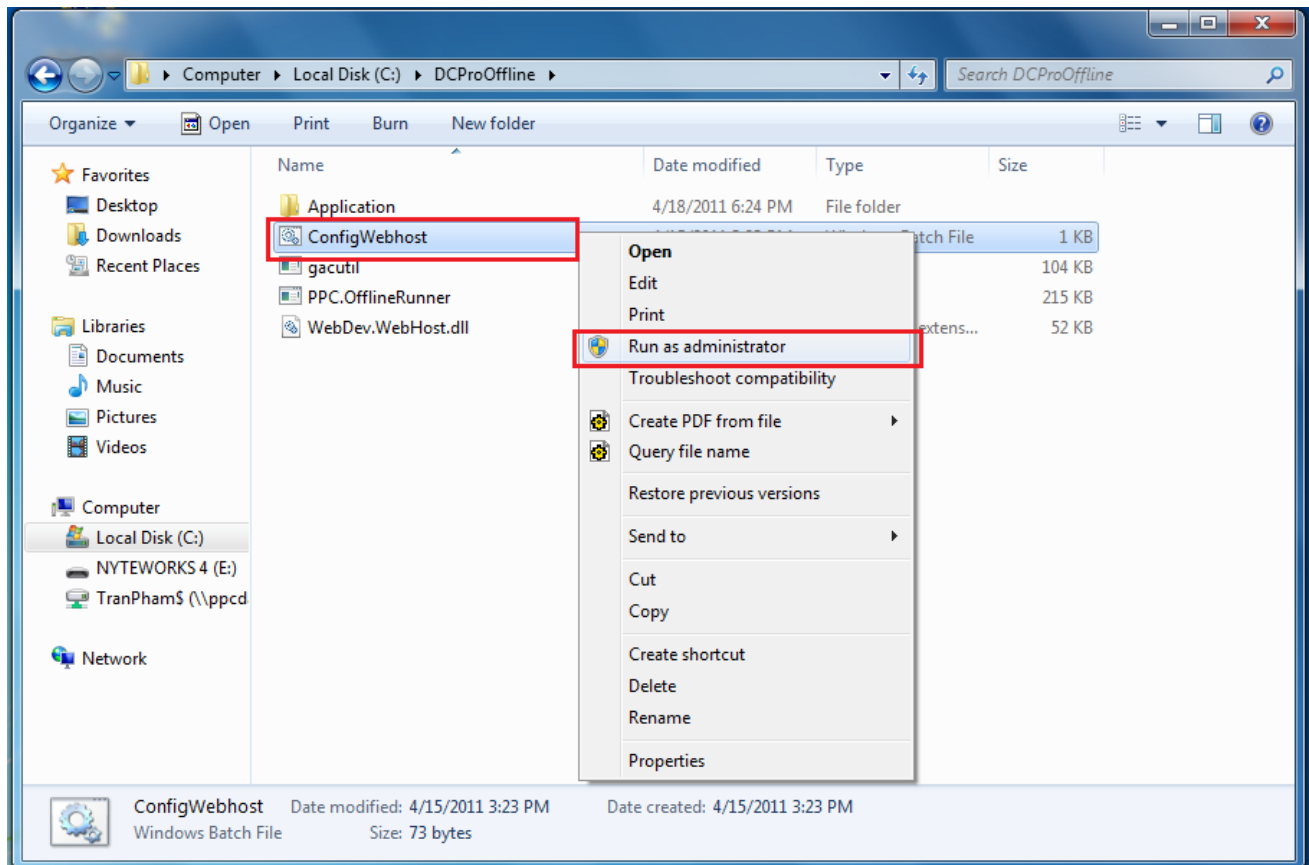

2. Click “OK”

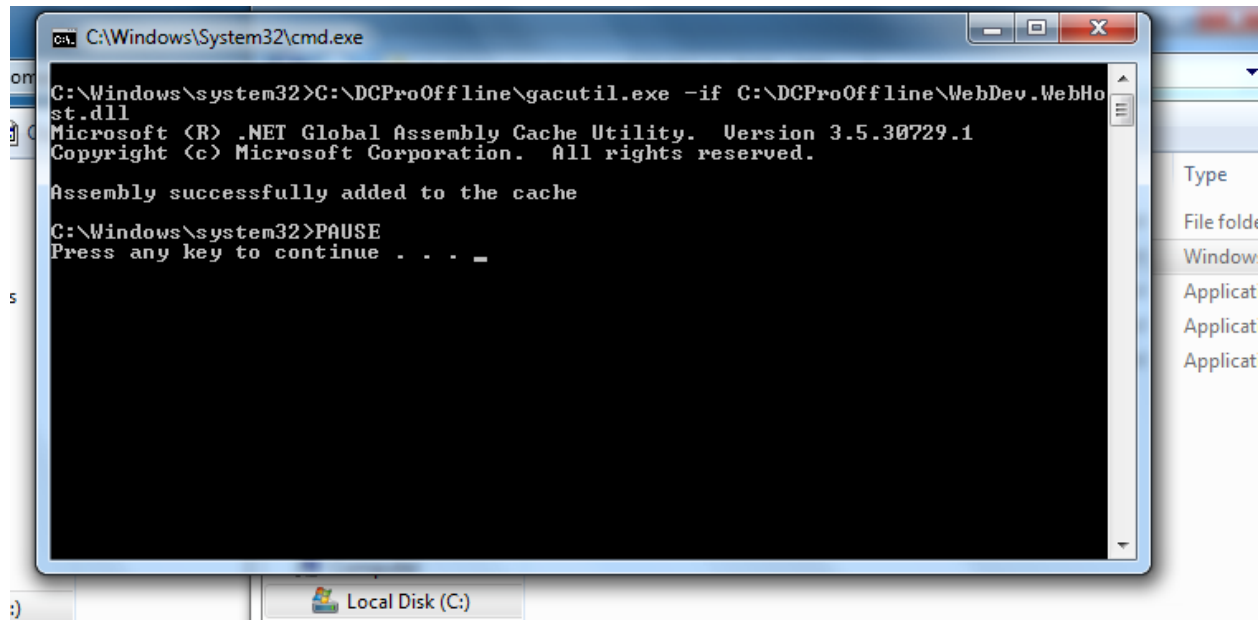

3. The zip file will auto-extract to the C:\DCProOffline directory, as shown below:

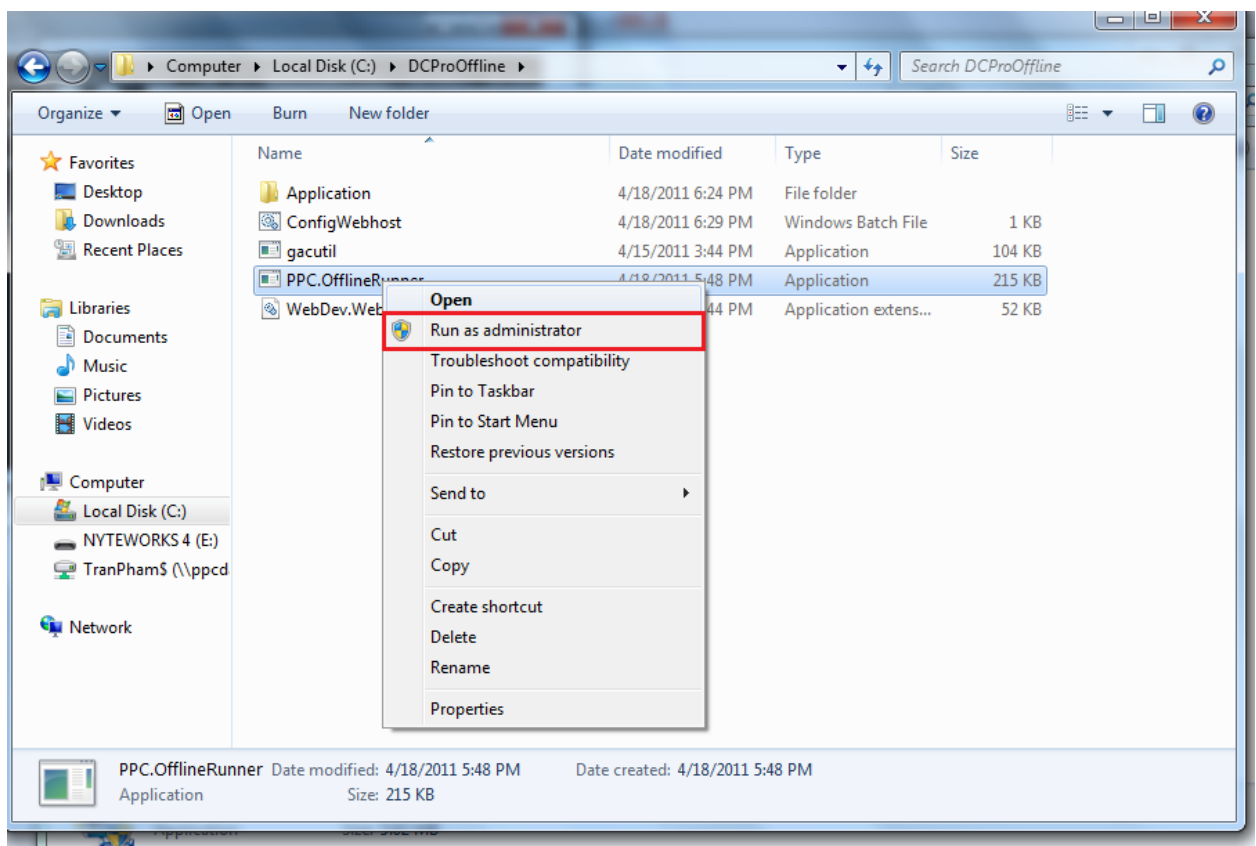

4. Navigate to C:\DCProOffline, right click on "ConfigWebhost.bat" and select "Run as administrator"

5. If the ConfigWebHost.bat file has been successfully executed, a “Assembly successfully added to the cache” prompt screen will appear, as shown below:

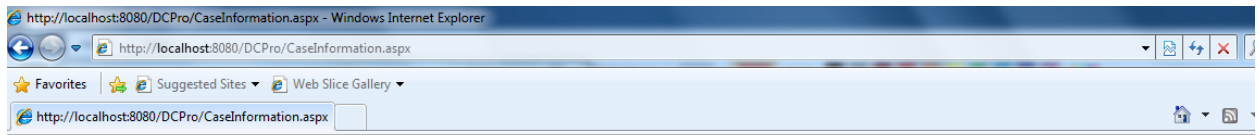

6. Now close the prompt screen, then click “PPC.OfflineRunner.exe”, and then click “start” button

7. Click on the blue link to start DCPro in Internet Explorer (or other default browser on your system.)

8. Click “Create New Case” to start working on a new DCPro case:

### Step 1: Case Information

Welcome to DC Pro, if you are a returning user and wish to modify an existing case please select the case below. If you wish to start a new case please select "Start New Case" below.

DC Pro will require information on IT operations as well as facilities infrastructure operations, and may require that information be obtained from multiple people within an organization. There are two options for gathering and inputting information from multiple people:

1. Collect and input: Ask each person to provide their information using the [checklist](#), and have one person enter it into DC Pro
2. Sequential direct input: Ask each person in turn to log in to DC Pro and enter information (DC Pro allows you to input data over multiple sessions).

If you have a DCPro case file on your computer that you would like to open, follow the instructions below:

1. Click the Browse... button.
2. This will open a dialog box to locate the DCPro case file on your computer. It will have an extension of .DCP. You will have to remember where you previously saved the DC Pro case file.
3. Once you have highlighted the DCPro case file, click the Open button in the dialog box to select the file. You should now see the full name and path of the DCPro case file in the text box.
4. Click the Open Case button. This will upload the case file from your computer to the server, open the case and take you to Step 1 - Case Information.
